

(Assistant) Production Manager

Excellent opportunity in at GrayWolf's Limerick, Ireland manufacturing facility. Established in 1998, GrayWolf is the worldwide market leader in high-end, portable indoor air quality (IAQ) instrumentation with distributors in 50+ countries. We also manufacture products for worker toxic gas exposure, airflow/pressure (HVAC) measurements, invitro-fertilization (IVF) and other environmental applications. We are headquartered in Shelton, Connecticut USA, with a small, but key production/calibration/service facility in Ireland. This position represents a significant growth opportunity, as we scale up production following the introduction of several *major* new products end 2019 and through 2020.

Responsibilities for this hands-on position will include daily co-management of a small team in Ireland for final assembly, calibration, QA/QC, inventory, service and (worldwide) shipping. Inventory control includes overseeing our supply chain of local assemblers and worldwide sensor/accessory/parts manufacturers.

The ideal candidate will have excellent managerial skills and several years of experience in an electronic/environmental manufacturing/quality test environment. A diploma/degree in production/electronic/electrical/mechanical/chemical engineering or relevant science/engineering field is required. Must demonstrate a superior independent work ethic, excellent organizational skills and the ability to work well with a small, diverse team in a dynamic, fast-paced environment. While production management experience is preferred, a candidate with relevant experience that is ready for the move to this level of responsibility would be considered.

Compensation package (excellent salary, profit-based bonus, flex hours, extended health coverage, and much more) based on experience and competence. Email HR@GrayWolfSensing.com.
