

In-house **Service/Calibration Technician** with expanding, leading-edge environmental instrumentation manufacturer. Conduct calibration, repair, service and inventory support for the advanced air quality meters that we manufacture in the US and in Ireland and which are distributed and supported worldwide. We will train you on servicing our cutting-edge instrumentation and calibration equipment. Exceptional career growth potential, especially for the candidate that might want to later expand into technical sales support. Since 1999, GrayWolf has been a market leader for the rapidly growing indoor air quality (IAQ), sustainable green building and HVAC instrumentation markets. Responsibilities to be performed at our Research Drive, Shelton, CT Worldwide Headquarters. Conduct specific Gas, Air Velocity, %RH, Temperature, Pressure and Particulate calibrations. We will train you, following GrayWolf's EN-17025 compliant quality procedures, for this diverse skill set which enables outstanding growth potential. Electronics/science/engineering/lab related education/experience, good phone skills, computer proficiency required. \$38,500-\$50,000+ starting salary (dependent on experience/education) *plus* small commission, with outstanding benefits package (premier health coverage, matching 401K, summer flex hours, etc., etc.).
